Discussion:

- In the example, the number of states was almost doubled

... and it can become even worse

- The conflicts in states q_1, q_2, q_9 are now resolved !
e.g. we have:

with:

$$\{ \$, + \} \cap (\text{First}(*F) \odot \{ \$, +, * \}) = \{ \$, + \} \cap \{ * \} = \emptyset$$

30/54
